SKILLS

- Variety : JAVA., Solidity, C, C++, Go, Python and JavaScript.
- Front-End : React, Bootstrap, CSS, Redux, Material, Swings and OpenGL.
- Back-End : Node, Express, MySQL, MongoDB, Web3, Heroku and Surge.
- Consistent, responsible and an incredibly ductile rookie.
- Motivated, team player and other typical jargon.

EXPERIENCE

Full-Stack Intern at Infosys

Trained as a MERN stack developer for two months at the Mysore campus. I developed RESTful APIs with NodeJS and single page web-applications in React and Redux. Since it was a training program none of them were production applications, nevertheless didn't fail to maintain design standards.

Intern at The Mana Network

I worked as a Business Development Associate in the Client Acquisition team, coming up with several marketing strategies taking them from ideation to implementation that resulted in a recurring increase in revenue.

Content Writer at Lodhan Live.

I've written professional profiles for over five stand-up comedians and multiple other pieces of content keeping in mind customer psychology. I realized the impact, a piece of content can have on people, all just with a couple of strategically placed words.

OBJECTIVE

I am a super driven student with killer instincts, lightning fast grasping power, a knack for getting my thoughts across, a never ending obsession to learn, as well as incredible people skills to get things done. I believe that life is all about the acquisition of skills and putting those skills to the test in service of something bigger.

EDUCATION HISTORY

CAMBRIDGE INSTITUTE OF TECHNOLOGY

BE Computer Science | 2020
